CountR – Innovative Cashless Solutions

Cashless payment is CountR's expertise

2Pay is the gaming industry's smallest form factor self-service kiosk for Point Of Sale (POS) Debit card to TITO ticket transactions. CountR's latest innovation, 2Pay leverages cashless services to improve the player experience and facilitate access to funds. 2Pay also reduces cash handling and optimises cash flow. 2Pay streamlines cash processing from supply at ATM, through collection and accounting of wagers and all the way to banking.

2Pay was developed as a direct result of CountR's strong cooperation with its partners and leads the way in casino payment modernization. 2Pay provides players with the payment choice they have come to expect from services driven organisations. With 2Pay, CountR allows operations to keep pace with the industry evolution towards payments digitalization without the need to replace or modify gaming equipment. 2Pay meets the best standards of consumer protection and operations digital payment security requirements.

2PAY TITO and cashless POS kiosks

- Facilitate funds access right by any gaming device
- Eliminate queuing at the ATM
- Reduce cash handling
- Deliver a responsible and safe payment alternative
- Provide an easy-to-use multi-language interface
- Interface to over 70 TITO and cashless systems

With 2Pay, Patron can immediately start or continue playing without having to carry or withdraw cash, simply inserting the POS issued TITO ticket in any TITO equipped gaming device.

With a POS Debit only solution, Customers are provided with a responsible digital payment option.

Boost revenues and optimise cash flow

With 2Pay, gaming operators provide their guests with the payment interface they have come to expect as readily accessible from any retail, hospitality and entertainment space. 2Pay modernizes casino payment options and generates a new revenue stream.

A winning combination for operators.

- 2Pay issued/purchased vouchers mean quicker revenue banking and less cash awaiting processing in slots
- 2Pay brings additional customer service at no added cost
- 2Pay generates additional transactional revenue streams
- 2Pay is a self-service customer interaction point
- 2Pay reduces cash handling
- 2Pay cuts cash management cost: no cash fills and no cash drops required
- 2Pay facilitates cashless flow
- 2Pay is easy to install side by side with slots and does not require any slot modification
- 2Pay uses secure EMV technology
- 2Pay is administered via ART central management platform
- 2Pay works in connection with any TITO system in place

“As player behaviour evolves, 2Pay delivers a safe access to funds from debit accounts whilst reducing cash handling.”

Rainer Seyer, CountR CEO

ART Central Management

- Alarm system and remote monitoring
- Configurable access levels for casino personnel
- Remote software update
- Ad placement during kiosk idle times or even during specific customer transaction situations

Carded Cashless and e-wallet options

2pay POS transaction can also enable the re-charge of cashless card accounts integrating with card cashless and ewallet systems.

The guest inserts or touches the reader with the medium in use (card/phone) to identify the account to load and proceeds with the POS transaction.

The paid-in amount is then credited to the player/card account with immediately availability.

Additional Feature

Player tracking ready,
Configurable to align with AML requirements,
Multi, selectable user language,
Pays out jackpot winnings
(requires operation by casino personnel).

Smart hardware design

2pay uses a small foot print modular design for:

- ease of integration
- ease of service
- maximum application flexibility
- ease of upgrading

Best in System connectivity

With 70+ ticketing and carded cashless systems integrated, CountR development team's knowhow is a system integration powerhouse. Cashless transactions are processed in connection with and verified by the cashless system.

2pay Technical Data

ATM graded Card Reader and PIN pad
